Innovative Full-Stack Developer with a passion for crafting user-friendly websites. I've honed my problem-solving abilities by tackling various coding challenges. I'm eager to join a dynamic team where I can contribute to the success of a reputed company.

Work Experience

Full Stack Development Intern, Navodita InfoTech 

01/2024 – 02/2024

Remote.

Task: E-Commerce Website

Role & Responsibilities: Independently developed all functionalities of the application, encompassing user registration, login, product browsing, cart management, and purchase processes. Implemented an admin panel for efficient management of products and orders. Overcame challenges in connecting to MongoDB and ensuring effective data storage by creating and managing tables.

Results: Simplified and secured online shopping experience, employing web technologies such as HTML, CSS, JavaScript, Java, JDBC, Servlets, JSP, and MySQL. Received a Letter of Recommendation.

Education

Btech (Computer Science and Engineering), KL University

2021 – 2025

CGPA : 9.2

Vijayawada, India

I am currently a student Peer Mentor.

XII (MPC) - BIEAP, Aditya junior college

2019 – 2021

Percentage : 90.5%

Palakollu, India

X - AP SSC Board, Sri chaitanya techno school

2018 – 2019

CGPA : 9.8

Palakollu, India

Skills

Programming Languages

- C, JAVA, PYTHON

Front End Technologies

- HTML, CSS, JAVASCRIPT, REACT-JS

Back End Technologies

- NODE-JS, MongoDB, MYSQL

Non - Technical Skills

- Teamwork, Time management.

Certificates

- AWS Cloud Practitioner [↗](#)
- AWS Solution Architect [↗](#)
- Red Hat Certified Enterprise Application Developer [↗](#)

Projects

1, Star Events [↗](#)

Role & Responsibilities: As part of a group project, I worked as a team member to design and put together features like virtual login/signup, password recovery, and a simple dashboard using HTML, CSS, and React.js. Collaborated on integrating Google Maps and the feedback system.

Results: Successfully delivered a user-centric platform, enhancing event management efficiency.

2, Budget Tracker Server-side Application [↗](#)

Role & Responsibilities: Solely developed the ExpenseTracker website using React, managing tasks such as user authentication, CRUD operations, and MongoDB integration. Overcame challenges in connecting to MongoDB and ensuring proper data storage through research and utilization of Google resources.

Results: The website guarantees secure user authentication and efficient expense tracking, deployed on vercel for seamless accessibility.

3, Weather Application [↗](#)

Role & Responsibilities: Independently developed frontend interface with HTML, CSS, and React, integrated OpenWeather API for accurate state-based weather details.

Results: Developed a user-friendly platform, providing precise weather information for any state, deployed on Netlify for seamless access.
