ABOUT ME

I'm a full stack developer who loves creating and improving web-sites and applications to make users happy. I'm all about logical thinking and getting results. I enjoy finding smart ways to build websites, apps, and platforms that give companies an edge and help them make more money.

I'm good at solving problems and figuring out how things work. I stay calm under pressure and stay focused on finding solutions. My goal is to use my technical skills to make things better and easier for people. Aspiring to gain a full-time position in a reputed company.

WORK EXPERIENCE

AICTE (Data Analytics Virtual Internship)
