Career Objective

Excited to start my career with a company that values growth and learning. Looking to use my front-end and back-end skills to build quality solutions and support the team's success.

Work Experience

Full Stack Development Intern   January 2024 –
Navodita InfoTech ⧉   February 2024
- Designed and implemented an **E-commerce website**, covering functionalities such as user registration, login, product browsing, cart management, and purchase processes.
- Built an admin panel for product and order management, ensuring effective data handling through MySQL integration.
- Utilized HTML, CSS, JavaScript, Java, JDBC, Servlets, JSP, and MySQL to enhance the shopping experience.
- Recognized with a Letter of Recommendation for delivering a secure and simplified user interface.

Education

Bachelor of Technology in Computer Science and Engineering   2021 – 2025
KL University   Vijayawada, India
- **CGPA : 9.5**

XII (MPC) - BIEAP   2019 – 2021
Aditya junior college   Palakollu, India
- **Percentage : 90.5%**

X - AP SSC Board   2018 – 2019
Sri chaitanya techno school   Palakollu, India
- **CGPA : 9.8**

Skills

Programming Languages
- C, Core JAVA

Front End Technologies
- HTML, CSS, JAVASCRIPT, REACT-JS

Back End Technologies
- NODE-JS

Database
- MongoDB, MYSQL

Non - Technical Skills
- Teamwork, Time management.

Certifications

- AWS Cloud Practitioner ⬀

- Red Hat Certified Enterprise Application Developer ⬀

Projects

1, Library Management System
- Designed and implemented a user dashboard with features for book borrowing, return tracking, and account management using React and MySQL.
- Developed an admin panel for managing books, approving borrow/return requests, and overseeing user activities, ensuring efficient library operations.

2, Budget Tracker Server-side Application ⬀
- Created an Expense Tracker with React, focusing on user authentication, CRUD operations, and secure data storage using MongoDB.
- Deployed the website on Vercel, enhancing accessibility and reliability for users.

3, Weather Application ⬀
- Designed and integrated a user interface with HTML, CSS, and React, connecting to the OpenWeather API for weather details.
- Delivered an efficient, state-specific weather forecasting platform, deployed on Netlify.

Accomplishments

Research Paper ⬀
- Title: "Unveiling Hidden Ties: Exploring Community Structures in Social Networks Using Advanced Graph Analytics"
- Published in 2023-ICRASET
