CAREER OBJECTIVE

Computer Science graduate with hands-on experience in **Frontend Development** and **Manual Testing**. Skilled in Java, web technologies, and problem-solving, with a strong ability to build and test high-quality software applications. Seeking a Software Developer role to leverage my development and QA experience while continuously learning new technologies and contributing to reliable, scalable software solutions.

SKILLS

Programming Languages	Java, Python
Frontend	HTML5, CSS3, JavaScript, TypeScript, React.js
Backend	Node.js, Express.js, REST APIs
Databases	MySQL, MongoDB
Core CS	Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS
Testing & Automation	Functional, Regression, Smoke, Sanity, End-to-End (E2E), UI, Cross-Browser, API, Test Case Design, Bug Tracking, Playwright
Tools	Git, Postman, JIRA, Swagger, VS Code, Eclipse

WORK EXPERIENCE

WebileApps Vijayawada, AP	01/2025 – Present
- Completed a 6-month Software Development Internship (01/2025 – 06/2025) focused on frontend and backend technologies. - Worked as a Frontend Developer (07/2025 – 08/2025), developing responsive web interfaces. - Currently working as an Associate Quality Analyst (09/2025 – Present). - Analyze business requirements and design detailed test cases. - Execute manual testing across multiple client applications to ensure software quality. - Identify, log, track, and verify defects while collaborating with developers to ensure timely resolution. - Participate in sprint planning, daily stand-ups, and client demo sessions.	

EDUCATION

KL University B.Tech, Computer Science & Engineering CGPA: 9.5/10	2021 – 2025
Aditya Junior College XII (MPC) 90.5/100.0%	2019 – 2021
Sri Chaitanya Techno School X CGPA: 9.8/10	2018 – 2019

PROJECTS

Library Management System	React.js, Node.js, MySQL — lms-nine-kappa.vercel.app
Developed a web-based application featuring a user portal for borrowing and returning books and an admin dashboard for managing books, users, and requests.	
Budget Tracker Application	React.js, Node.js, Express.js, MongoDB
Built an application with secure authentication and CRUD functionality to help users efficiently manage income and expenses.	
Weather Application	React.js — accuclimate.netlify.app
Developed an application using the OpenWeather API with location-based search and real-time updates.
